TO WHOM SO EVER IT MAY CONCERN

This is to certify that **Manikantan Srinivasan** was associated with our volunteer-led initiative at **mlsquare.org** (an open source initiative to democratize AI), as **Intern- Data Scientist** from **01-June-2021 to 31-August-2021.**

During his tenure, he developed a Machine Learning model to predict whether a certain Computer Vision (CV) technique works on a given Mobile Device. He generated datasets via data augmentations, created useful features that can sufficiency represent a Mobile Device Configuration. He used these datasets to train a classifier that predicts whether the CV API call will be successful or not.

Regards
